

What is CombiTerraBIO-SR?

- CombiTerraBIO-SR is a potent combination various minerals like Zinc, Boron, Copper, Iron, Magnesium, Manganese and phosphorus.
- This advanced slow-release fertiliser delivers a balanced, bioavailable combination of essential micronutrients and macronutrients

Specially designed Slow Release Fertiliser

CombiTerraBIO-SR

Your first step towards

Enhancing Overall Plant health.

Mumbai- 400072

Green Technology. Blue Growth.

At Terrapha

*We believe
in transforming natural
growth systems,
responsibly .*

Why CombiTerraBIO-SR?

CombiTerraBIO-SR
Provides a balanced
profile of Zn, B, Cu, Fe,
Mg, Mn & P—preventing
hidden hunger and
micro-deficiencies.

CombiTerraBIO-SR
improves tolerance to
diseases and abiotic
stress.e

CombiTerraBIO-SR
has a slow-release
design cuts labour,
transportation, and
dosage
requirements.

Let's Talk Benefits

- ✓ Complete & Balanced Nutrition in One Product
- ✓ Higher Yield & Superior Produce Quality
- ✓ Stress Tolerance Across All Growth Stages due to slow dispersion of required minerals
- ✓ Ideal for All Crops & Production Systems

Sustainability Goals that We Meet

Terrapha, creates **numerous new jobs** during **procurement, manufacturing, distribution**, etc., which reduces poverty.

Terrapha can produce ample supply of **SCP-biopolymer based feed supplement** that **increases fish yield**, thereby feeding the growing population

Our feed supplements **enhances gut health & immunity** that drops antibiotic usage, **reducing antibiotic resistance** risks in poultry farms.

Zero antibiotic residue means healthier farm ecosystems. **TerraPURO-NP** is used for **water purification**.

Higher acceptance of poultry, aquaculture, cattle outputs along with **export of value-added feed additives**, contributing to the economic growth.

Terrapha improves feed efficiency, better health outcomes, **positions the industry toward innovation-led growth**.

Terrapha establishes integrated waste-to-value bio-refineries, creating **new green industrial clusters**.

Converts **waste into high-value feed**, reducing the dependence on fishmeal, or chemical ingredients.

Litter enriched with PHA-degraded components improves soil carbon content and microbial activity.

100% Biodegradable, leaving neither micro-plastic footprint nor antibiotic / chemical residues.

No arable land use and **no deforestation**.
